
Modes (open symbols: named and literature hybrids)
share of eligible recent pairs in a collinear block
breadth: share of genes in recent pairs
multi_contig_blocks (385)
single_contig_pair (78)
tandem_array (22)
dispersed_selective (84)
dispersed_diffuse (256)
mixed (688)
uninformative (5020)
Block pairs: dS against how many contig pairs
median dS of block pairs
contig pairs holding blocks
V. longisporum
Z. bailii
P. graminis 21-0
Pair categories (informative genomes)
share of eligible recent pairs in a block
category
other pairs
TE-domain gene
OrsD gene
identical CDS
