
Modes (open symbols: named and literature hybrids)
share of eligible recent pairs in a collinear block
breadth: share of genes in recent pairs
multi_contig_blocks (301)
single_contig_pair (62)
tandem_array (42)
dispersed_selective (112)
dispersed_diffuse (814)
mixed (896)
uninformative (4866)
Block pairs: dS against how many contig pairs
median dS of block pairs
contig pairs holding blocks
Z. bailii
V. longisporum
P. graminis 21-0
Pair categories (informative genomes)
share of eligible recent pairs in a block
category
other pairs
TE-domain gene
OrsD gene
identical CDS
