

Taxonomic breadth of the zoosporic phyla in BFD

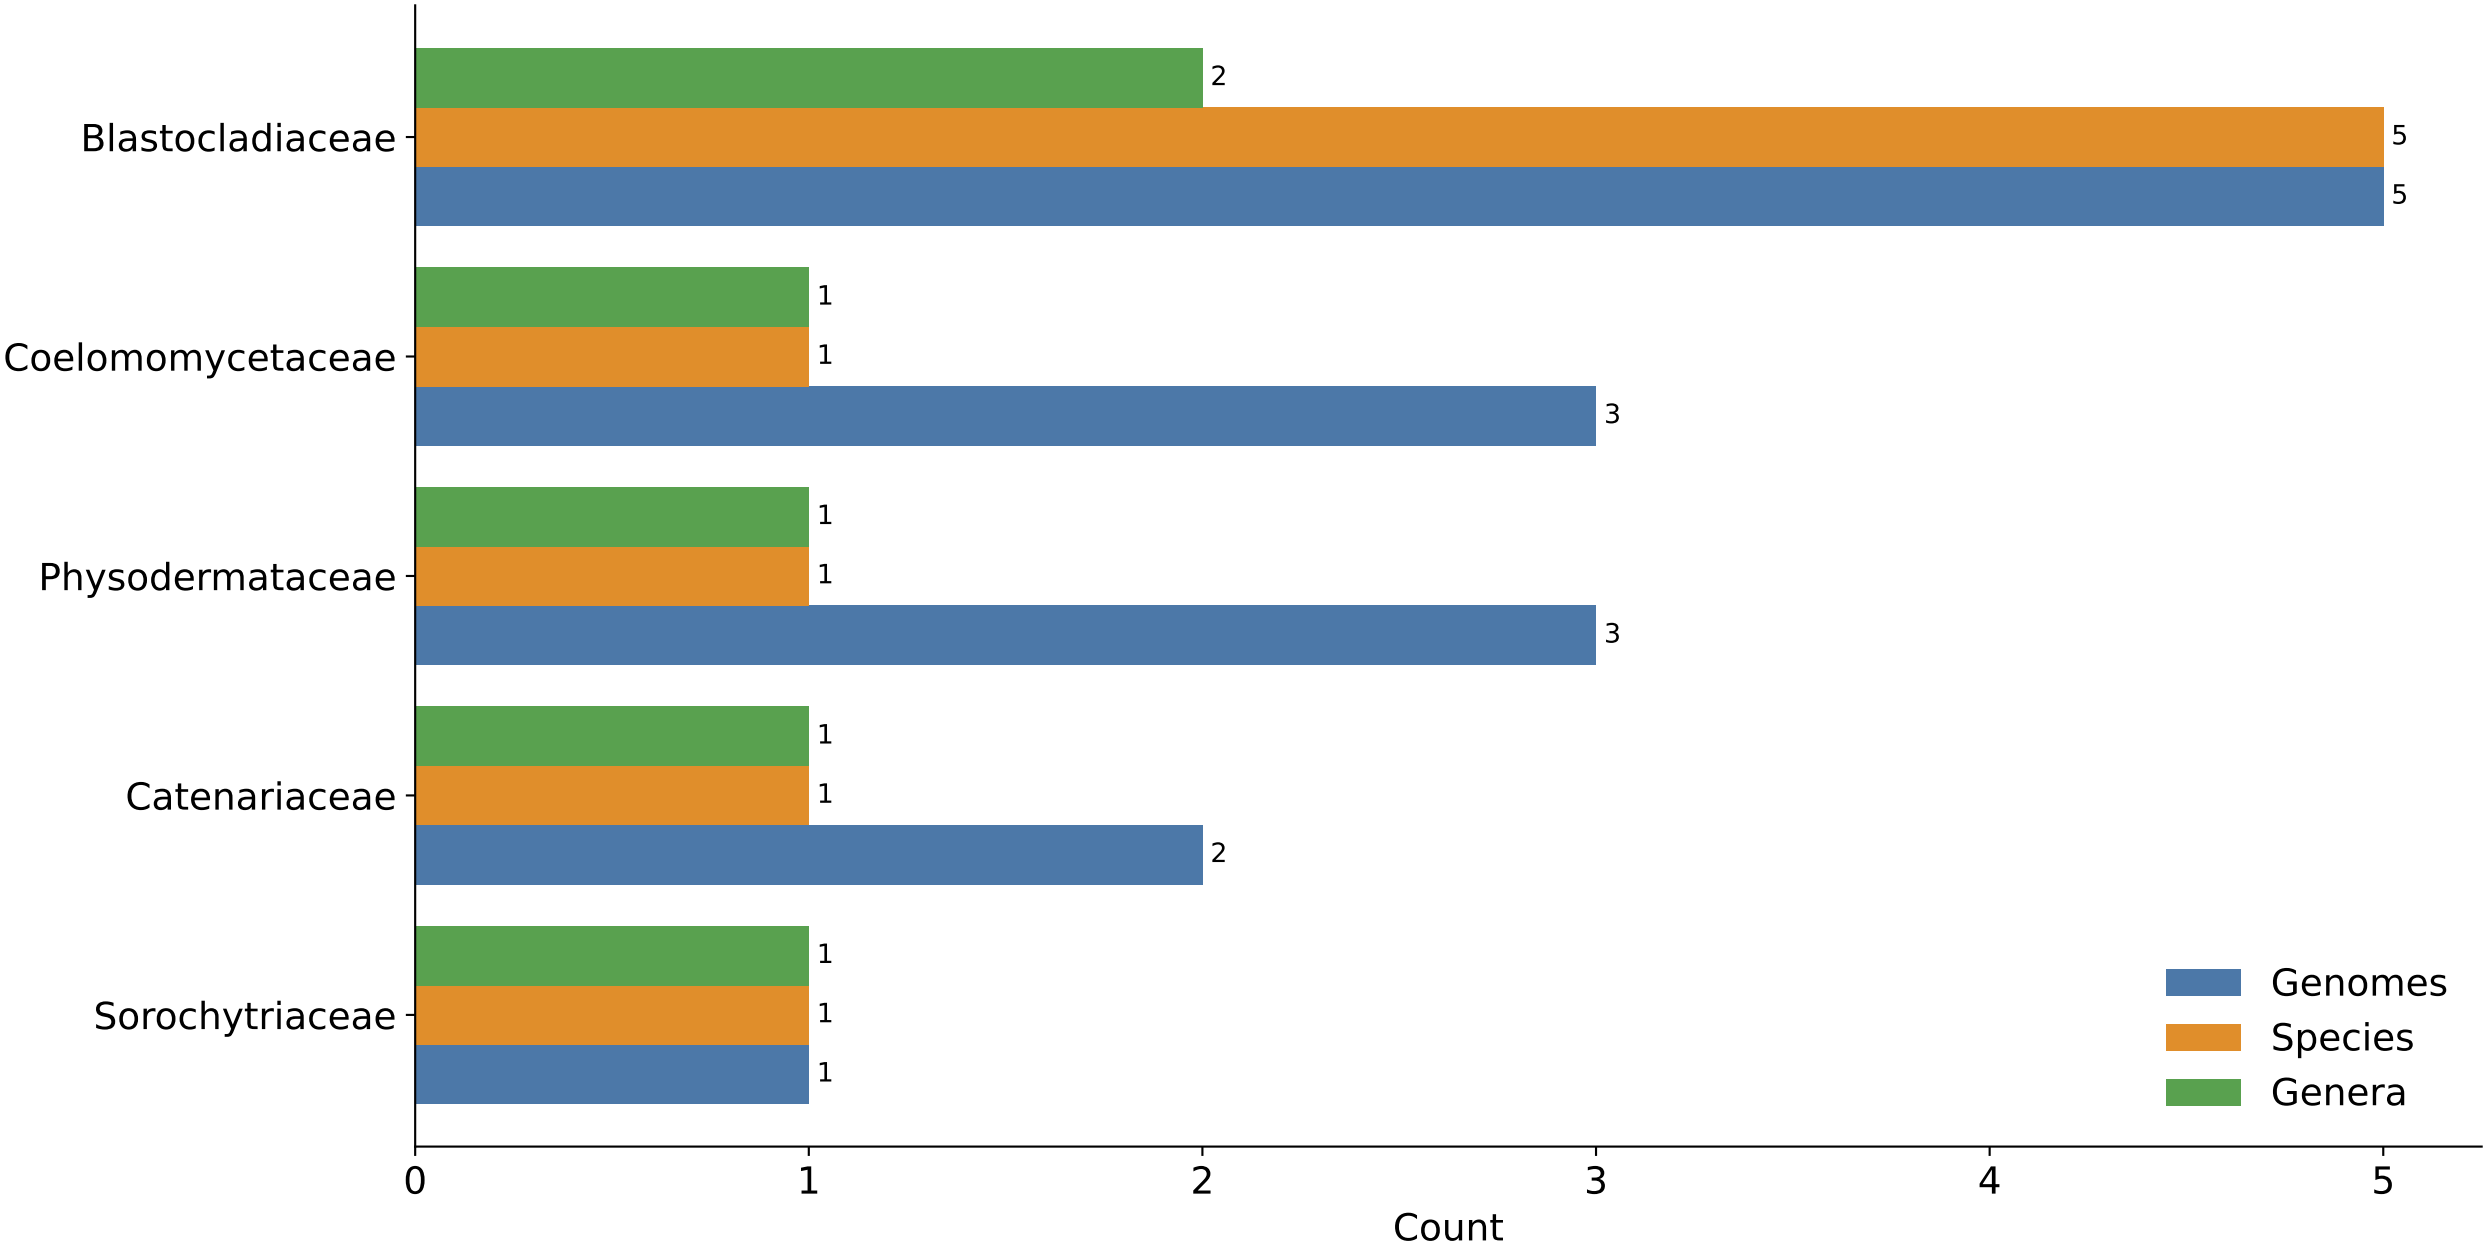

Source: samples.csv. Species = SPECIES column; 'Xxx sp. STRAIN' collapsed to 'Xxx sp.'. Genera = distinct GENUS values (blank GENUS not counted).

Chytridiomycota: genomes, species and genera per family (89 genomes, 59 species, 38 genera)

Source: samples.csv. Species = SPECIES column; 'Xxx sp. STRAIN' collapsed to 'Xxx sp.'. Genera = distinct GENUS values (blank GENUS not counted).

**Blastocladiomycota: genomes, species and genera per family
(14 genomes, 9 species, 6 genera)**

Source: samples.csv. Species = SPECIES column; 'Xxx sp. STRAIN' collapsed to 'Xxx sp.'. Genera = distinct GENUS values (blank GENUS not counted).

Neocallimastigomycota: genomes, species per genus
(26 genomes, 8 species, 5 genera, single family Neocallimastigaceae)
